Webdesign (UI/UX), Photography, Film

2008 – 2012 / Photography Department
Secondary School of Applied Art in Carls Bad

Adobe Photoshop, Illustrator, InDesign, Final Cut Pro X
HTML, CSS, JS, PHP, SWIFT

Hello, I'm 25 year-old open-minded person who wants to become a part of Škoda team that focuses on problem solving. I studied photography at high school and then continued at Film Academy in Prague as a film editor. Beside that I have been greatly involved in UX and UI designing as a freelancer. All this knowledge helps me interact with people through the most used forms of media. Making thing easily understandable to everyone is the idea that unifies all my work. I believe that in the automotive industry there are great possibilities to come up with new solutions, especially in HMI.

Feel free to explore my portfolio on the following pages.

PORTFOLIO

GÜDE Czech republic

This B2B e-commerce website was created from scratch for the Czech distributor of tools and machines GÜDE. My goal was to create truly intuitive system which doesn't need a user manual.

➕ Easy Editing

Every object is editable live on the site. You can try a non-public version yourself:

Pizza Mamma Mia

The restaurant offers over 100 pizzas so it's easier for the customers to search for their favorite ingredients.

Smart Search
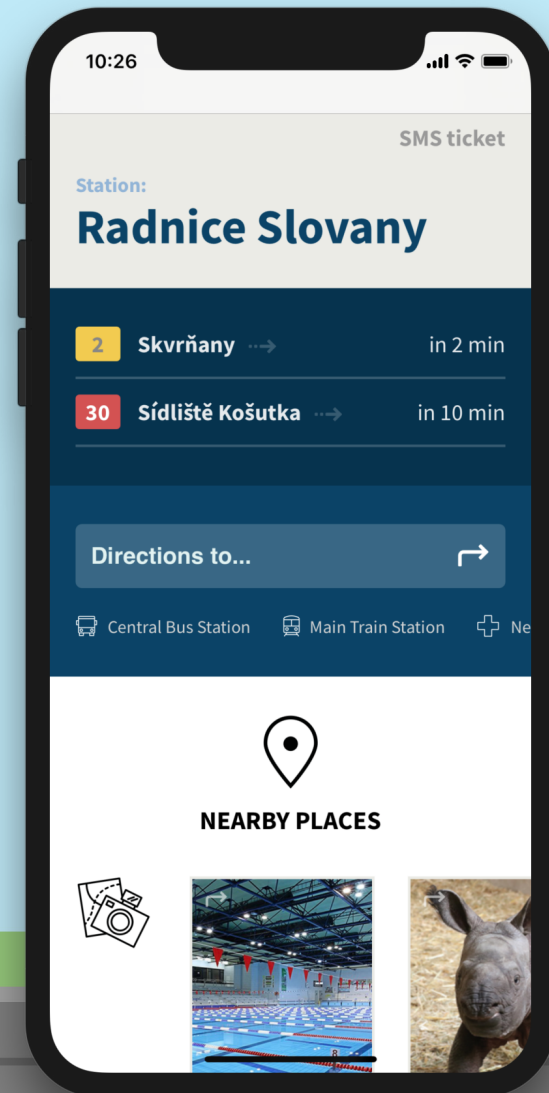

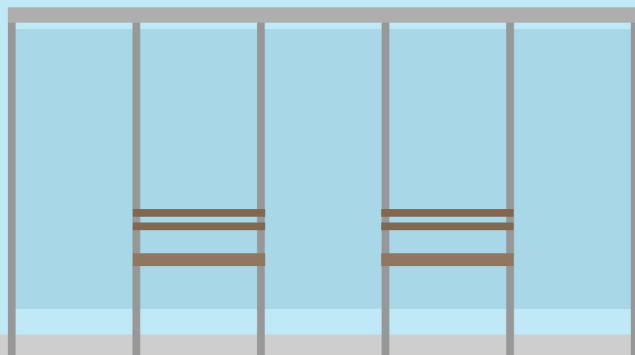

It can also handle specialities: hot, vegetarian, seafood.

Try searching: "ananas".

Smart Directions

Smart bus stop can provide passengers with useful information about arrivals as well as tourist attractions. This prototype won the first place in a hackaton in Prague. I contributed to the project with UX/UI designing and coding. The test application is coming to Pilsen and hopefully to hospitals.

The iOS game was developed as a part of my self-study of Swift programming language. The challenge of the game is to reach "Goal" number with minimum taps. The initial number is 2 and the player can multiply the number only by 2 or add 1. You can exercise your brain with prime numbers.
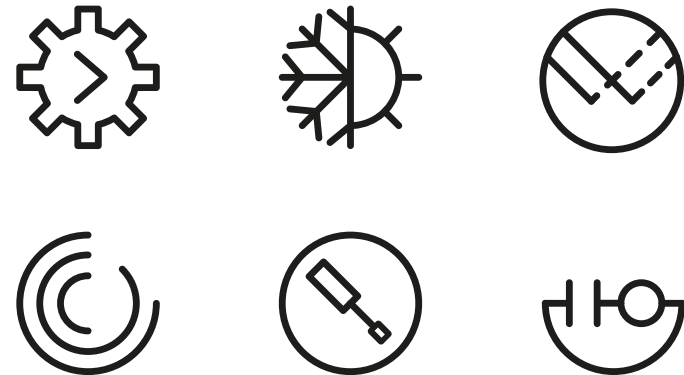

Icons

These icons were created for the navigation on the new Medical Supplies e-commerce website. Their main purpose is to make the user orientation simpler.

The same idea is behind the icons created for a technical company. However, these icons are more abstract and they work as metaphors,

/ Industrial Automatization, HVAC, Thermal Measuring, Visual Management, Installations, PLC Automation /

Font

abcdefghijklmnopqrstuvwxyz

The font is based on my handwriting style. It requires only
one stroke for each letter – except 4 letters (f, k, t and x).
The font looks unusual but is still readably.
